

for Mobile Vans in the Healthcare Sector

Administering emergency treatment to accident victims or heart stroke patients in an ambulance is essential for the patient's survival. In cases where a few seconds can make a big difference, having expert supervision from the very first minute is vital.

The Issue

The ambulance is chaotic.

Ambulatory video setup gets disrupted while the vehicle is in motion.

Failed communication due to distorted voice and video.

The PeopleLink Solution

The PeopleLink Solution PeopleLink InstaVC: Collaborate virtually

- HD video conferencing on low bandwidth.
- Uninterrupted, clear-cut view of patient.

PeopleLink Six Channel Inbuilt Video Mixer

- 2 Telepresence cameras fixed on patient.
- Other cameras fixed on patient vitals, nurses and support staff.

What are Your Needs:

To have an expert monitor the patient's condition and supervise ambulatory care from the first minute.

To make necessary preparations for the patient at the hospital in advance.
