

## for Home Care in the Healthcare Sector

*Enable doctors to remotely monitor a patient's condition before surgical procedure and follow up afterwards. Doctors are required to ensure patients do the necessary preparations before operation and take the necessary precautions during recovery.*

### The Issue

Admitting patients earlier than required.

Delays in discharging the patient.

Delays in admitting new patient.

### The PeopleLink Solution

**The PeopleLink Solution**  
**PeopleLink Pulse: Monitor patients remotely**

- Doctor-patient HD virtual connect.
- Update patient's health records, send reminders.
- Autoschedule review checkups.

### What are Your Needs:

To ensure patients follow the doctor's instructions at all times.

To monitor the patient's vitals throughout.

To ensure the patient is physically fit for surgery.

To supervise post-operative care and recovery.
