

## for Virtual Training using vLMS in the Education Sector

*PeopleLink solves the problem of bridging the gap between education and learners. The technologies applied transform the authentic brick and mortar classroom into a global learning platform. Students can learn directly from the experts on various subjects, ask questions and collaborate with peers without shifting base.*

### The Issue

The need to have a learning management system.

The need to ensure that the content delivered to students across and within campuses is standardized.

### The PeopleLink Solution

#### PeopleLink Acumen: Manage Teaching

- Create courses.
- Offer learners video lessons.
- Offer course subscriptions.
- Manage content delivery, assessments, analytics of syllabus completion.
- Ensure that lesson plans are followed as per schedule and the syllabus is completed on time.

#### PeopleLink Acumen: Standardize teaching delivery

- Central content repository.
- Control pedagogy.

### What are Your Needs:

The ability to facilitate long-distance training?

Enable efficient knowledge transfer?
