

## for Judicial Processes in the Government Sector

*Another challenge is to facilitate judicial processes which touch upon issues such as cost, efficiency, and, importantly, security. This necessitates having in place hardware and software that can reliably and securely facilitate judicial processes.*

### The Issue

The need to have a virtual solution to conduct critical court procedures that have a bearing on security.

The need to reduce travel expenses.

Have a repository of information about cases and court proceedings.

### The PeopleLink Solution

#### PeopleLink LIVE

- Trials conducted over Live ensures security.
- It also avoids traveling expense involved in inmate transit.
- The video conferencing deployment enabled trials widen its scope where the judge, the accused, the defendants need not physically share the same space but still be prominently visible to each other.
- Live trials recordings are made available for future references and judicial process.

### What are Your Needs:

The ability to ensure increased security on judicial/court procedures?

The ability to cut down on travel costs of inmates?
